DETAILED ACTION***Election/Restrictions***

1. Applicant's election with traverse of Group II, claims 2-3, 5-21, 24, 25 and 27 in the reply filed on 11/14/05 is acknowledged. Upon review of the current claims, it has been found that an additional election of species requirement is necessary. Claim 1 is withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected Invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 7/18/2005.

1. Claims 2-3, 5-21, 24, 25 and 27 are generic to a plurality of disclosed patentably distinct species directed to a composition comprising

- a.) A functional 2-methoxyphenol derivative of formula (1) comprising substituent groups X, Y and Z.
- b.) An aqueous medium
- c.) A colorant.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is required to elect a specific aqueous medium, a specific colorant and a specific 2-methoxyphenol derivative. Because the 2-methoxyphenol derivatives are functional and/or reactive in nature, applicant is required to indicate a specific chemical description for each of substituents X, Y, and Z on the 2-methoxyphenol derivative of formula (1). For example, applicant could indicate that X is unsubstituted alkylene, Y is -O- and Z is $-(CH_2CH_2O)_a-(CH_2CH(CH_3)O)_b-(CH_2CH_2O)_c-H$. Applicant is advised that the term,

Art Unit: 1714

“substituted”, is indefinite, since the claims do not point out any specific substituent groups relevant to this term. However, no formal rejection is being made at this time.

3. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention. A telephone call was not made to request an oral election to the above restriction requirement.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Applicant is advised that the election of 11/14/05 does not set forth a single disclosed species and this application will be abandoned if an election is not made. Applicant's description of the elected methoxyphenol derivative includes more than one single species.

Conclusion

6. The timely submission filed on 11/14/2005 is not fully responsive to the prior Office action because it fails to elect a single species. Since the submission appears to be a *bona fide* attempt to provide a complete reply to the prior Office action, applicant is given a shortened

Art Unit: 1714

statutory period of ONE MONTH or THIRTY DAYS from the mailing date of this letter, whichever is longer, to submit a complete reply. This shortened statutory period supersedes the time period set in the prior Office action. This time period may be extended pursuant to 37 CFR 1.136(a).
